ported abuse in a group of bulimics was associated with measures of dissociation, cognitive content, and bulimic pathology. Participants: The participants were 23 bulimic women who met DSM-IV criteria (American Psychiatric Association, 1994) for bulimia nervosa (N = 15), binge eating disorder (N = 3) or anorexia of the binge/purge subtype (N = 5).

PREDICTION OF BULIMIC BEHAVIORS: Susan Quay Love

use of the term "bulimia" to describe both a symptom (binge eating) and a syndrome of behaviors and affective experiences. Bulimia is derived from the Greek and translates as "ox hunger" yet the binge eating pattern of bulimics has rarely been found to be the result of excessive appetite (Mitchell & Pyle, 1982). Inclusion of other behavioral and
